

## WIRCS Indoor Flying Rules and Regulations

24 March 2014

1. Person flying must have a valid AMA card in his/her possession and be a WIRCS member or guest.
2. Pilots and guests must not go out on the floor while other pilots are flying, without permission from the pilots who are flying. If you are retrieving a downed airplane, let the other pilots know so that they can attempt to avoid you or land.
3. The general flying pattern is counterclockwise around the gym. If you are doing something else, call out your intentions to let the other pilots know.
4. Helicopters and airplanes should not fly at the same time, unless the pilots agree that they will avoid each other, and fly in different areas of the gym.
5. All club members are responsible that the AMA safety code and that applicable club rules are followed.
6. Hand launches are allowed away from any pilots, helpers or guests.
7. Please be considerate of the pilot's line of sight with their plane (don't walk in front of the pilots).
8. Any furniture moved should be returned to its original configuration.
